Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 7-9 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Togo et al. (U.S. Patent No. 6175573).

- With respect to claims 1, 7, and 13, Togo teaches in a packet based multimedia system having a multimedia source device coupled to a multimedia display device by way of a bi-directional auxiliary channel arranged to transfer information between the display device and the source device and vice versa and a unidirectional main link arranged to carry multimedia data packets from the multimedia source device to the multimedia display device, a method of reducing multimedia packet overhead, comprising: prior to commencement of transmission of the data packets from the source device to the display device over the main link, communicating via the auxiliary channel data packet attributes to the display device (it inherently to understand that the data transmit via a communication channels as Fig. 1 shows); forming a reduced size data packet header for each of the data packets wherein the reduced size is commensurate with the data packet attributes already communicated via the auxiliary channel (e.g. Fig. 10 shows the header packet same size as packet); associating the reduced size data packet header with a corresponding one of the data packets (e.g. packet associates Fig. 7 shows); and transmitting the

data packet and associated reduced size data packet header from the source device to the display device over the main link (e.g. display on the screen as in Fig. 2 and Fig. 5 shows).

- With respect to claims 2, 8, and 14, Togo also teaches wherein the data packet is one of a number of associated multimedia data packets that take together form a multimedia data packet stream (e.g. Fig. 13 shows the packets and stream of multimedia).

- With respect to claims 3, 9 and 15, Togo further teaches wherein the multimedia data packet stream is one of a number of multimedia data packet streams each having an associated adjustable data stream link rate that is independent of a native stream rate (e.g. multimedia data packet streams in Fig. 13 is an independent of a native stream rate).

Allowable Subject Matter

3. Claims 4-6, 10-12 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
